SUMMARY

AI engineer with a production Software development foundation. At Yotta Infrastructures since 2023, I've shipped enterprise-scale platforms (Angular, Flutter, Python, NgRx) used by thousands of customers. Over the past year I've deepened my AI engineering practice — building RAG pipelines, multi-agent systems with CrewAI, and LLM-powered products using Groq and Google Gemini APIs. The result: three production-deployed AI apps — Nyaya-Pro, JobPilot AI, and ExamGenie AI — that solve real user problems. I bring the AI engineering depth and production discipline most pure AI candidates lack.

PROJECTS

Next.js · FastAPI
LangChain · FAISS
Google Gemini

Nyaya-Pro (Agentic Legal RAG)

nyaya-pro-assistant.vercel.app | [GitHub](#)

Agentic RAG legal assistant grounded in the Constitution of India, BNS, BNSS, and CPC. Features **agentic query routing** that classifies and dispatches queries to the correct legal domain before retrieval, **semantic cross-encoder re-ranking** to mathematically verify answer grounding, and **zero-hallucination** cited responses. Includes user auth, persistent case history, and cloud-synced sessions.

Next.js · FastAPI
CrewAI · Groq API

JobPilot AI

jobpilot-ai-rho.vercel.app | [GitHub](#)

AI-powered job application assistant using a **multi-agent CrewAI pipeline**. Analyzes a resume and job description to generate an ATS-optimized resume and personalized cover letter. Uses Ollama locally and Groq API (Llama-3.3-70b) in production.

Angular 18 · TypeScript
Google Gemini

ExamGenie AI

examgenie-ai.vercel.app | [GitHub](#)

Transforms uploaded study PDFs into interactive multiple-choice exams using **Google Gemini 2.5 Flash**. Supports syllabus-based generation (JEE, NEET, UPSC), difficulty selection, real-time performance analytics, and on-demand AI explanations per question.

Angular 17 · NgRx
Keycloak · TypeScript

OneYotta Portal (Yotta Infrastructures)

account.yotta.com

Customer-facing portal for managing data centre resources, invoices, and real-time infrastructure monitoring. Integrated **Keycloak** for SSO/OAuth 2.0 authentication; serves thousands of enterprise users.

Flutter · Dart
Android · iOS

OneYotta App (Yotta Infrastructures)

[Play Store](#) | [App Store](#)

Cross-platform **Flutter** mobile app for the OneYotta portal, enabling on-the-go data centre management, monitoring, and operations for Android and iOS users.

Angular · RxJS
D3.js · Bootstrap

MyPortal (Yotta Infrastructures)

myportal.yotta.com

Internal operations dashboard for monitoring server utilization, networking, and storage backup. Features **real-time data visualisation** with D3.js and integrated CCTV monitoring.

EDUCATION

June 2019 – May 2023

B.Tech — Computer Science & Engineering
Grade: **9.2 CGPA**

Pillai College of Engineering, New Panvel

EXPERIENCE

Apr 2025 – Present

Senior Software Developer

Yotta Infrastructures Pvt Ltd

- Leading frontend architecture for next-gen data centre operations platforms.
 - Mentoring junior developers.
 - Optimising CCTV live-playback streams for reduced latency and better UX.
- Angular 17 / Flutter / Leadership

Apr 2024 – Mar 2025

Executive

Yotta Infrastructures Pvt Ltd

- Led Angular v14 → v17 migration; integrated Keycloak & Azure AD authentication.
 - Improved dashboard performance by **30%** via NgRx state management optimisations.
- NgRx / RxJS / Keycloak / Performance Optimization

May 2023 – Mar 2024 **Graduate Trainee**

Yotta Infrastructures Pvt Ltd

- Built MyPortal monitoring tools and reusable Angular Material component library.
 - Implemented D3.js / Chart.js data visualisations for server utilisation metrics.
- Angular / TypeScript / Angular Material / D3.js
